

Research, Development and Environmental Information Advisory Committee
for the Mariculture Task Force

Notes on the R&D &EI AC meeting of October 14, 2016.

A general decision about documenting the status of R&D relevant to AK for aquaculture.
The following tasks were agreed upon.

- Task 1: Current information on aquatic farms in Alaska. What is being grown, what species have been applied for, what future directions may be, etc.
Cynthia Pring-Ham
- Task 2: Set up Google Docs for communication and train Stekoll in using it.
Ginny Eckert
- Task 3: Devise a mission statement for R&D and environmental information (EI) for the Advisory Committee (AC).
Carter Newell
- Task 4: Contact Kate Sullivan to prepare document on dive fisheries and enhancement needs.
Mike Stekoll
- Task 5: Contact Jeff Hetrick for information on research in hatcheries in AK
Mike Stekoll
- Task 6: Information on enhancement research in AK (AKCRRAB) and research on ocean acidification.
Bob Foy
- Task 7: Information on status of environmental information relevant to aquaculture in Alaska.
Carter Newell
- Task 8: Information on the status of research w/r to harmful algal blooms
Ginny Eckert
- Task 9: Information on the status of economic research w/r to aquaculture
Keith Criddle

Preliminary reports to be posted to Google Docs
