JUSTIFICATION:

Management biologists set a maximum harvest quota of two male goats or one female for the Rodman Creek Zone of the Unit 4 registration mountain goat hunt on Baranof Island (RG150). Quotas were calculated from 2015 and 2016 survey results. The limit of one female was set to encourage harvest of males and has been a successful strategy, allowing hunters more opportunity and lowering the risk of localized overharvest. As of Monday, October 16, 2017, one female goat has been reported harvested. Because the maximum harvest quota has been met in this zone, an emergency order is being issued to close this zone to mountain goat hunting at 11:59 PM, Wednesday, October 18, 2017.

This emergency order is necessary to restrict the harvest to the maximum sustainable level and prevent overharvest in this zone. Any additional harvest could have long-term negative effects on this goat population.
