Doug Vincent-Lang
Commissioner

By delegation to:

Cory Stantorf
Anchorage Asst. Area Wildlife Biologist

JUSTIFICATION:

A mountain goat survey of the Lake George hunt area conducted in July 2019 indicated the hunt area contains a minimum of 360 goats, 20 percent of which are kids. To ensure the population objective of at least 500 goats in Unit 14C that will sustain an annual harvest of 25 goats, comprising at least 60 percent males, harvest from this area should not exceed 21 goat points. The Lake George area is managed with separate hunts for resident and nonresident hunters. Fourteen of the total goat points are allotted for residents holding permit RG869. Total goat points are calculated using one point for billies and two points for nannies. Currently, 15 goat points (4 nannies and 7 billies) have been harvested by resident hunters from the Lake George drainage, and there are additional hunters in the field. To ensure sustainable goat numbers, this hunt will close at 11:59 pm on October 10, 2023.
