

AMEND RC # 77 BOF PROPOSAL ON THE DOLGOI ISLAND AREA FISHERY

Clarify how the proposed 80 thousand fish cap should be implemented:

Cap the Dolgoi Island Area fishery as addressed in RC 77 to where if adopted the fishery would be managed as follows:

1. There would be a single 80k targeted cap that would cover the combined pre July 26th sockeye catch. There would be no sub-caps as was originally presented in RC #77 BOF proposal.
2. The Department shall manage the Dolgoi Island area fishery pre July 26th to where the fishery shall close the fishery when fish-ticket records tabulate to a pre July 26th sockeye salmon harvest of at least 80 thousand fish.

Submitted jointly by: Chignik Regional Aquaculture Association and Concerned Chignik Salmon Fishers
