RE: Response to Proposal 6 (Arctic/Western Regional Board of Game Proposals)

I like the ideas that were presented in the letter from Patrick Jones about the combined drawing, online and line up or lottery, and to give other people that want a muskox to serve the left over permits in Bethel.

It would also provide guides or trasporters an opportunity to make a little bit of income in the village and for those who don't have a job. Also comes the subject of Nunivak Island hunt. Theres always local people who are complaining of only being issued 5 permits for an Island hunt, this has seemed to be a forever troubling issue. It would be nice to see more than just 5 cow permits to be issued. Alot of local people have been saying that isn't enough and always saying that the same people get permits every year. This village is a subsistence life style, we depend on the land and for those of you that don't living here is a hard life style. When we can't get enough of our subsistence, we are the ones that get effected the most.

Subject: Nelson Island Musk Ox

My name is Henry Simons, I live in Toksook Bay. I am in favor of option 3 of how musk ox permits should be allocated on the Island. Thanks.

Option 5. Keep the permit process as is and give additional, if needed, permits to the 5 villages by population and have the communities open access to harvest except during births.
My two cents:)
