March 13, 2015

To: Alaska Department of Fish & Game,

Enoch Mitchell has currently been addressing our subsistence issues. We are in support of proposal 202 as amended. We've been having a difficult time trying to harvest our Western Arctic Caribou Herd for 3 plus years with no success. There are many people concerned that this issue might become permanent and that we want our caribou. It is hard in the village without our caribou. This proposal 202 as amended will greatly make a difference in the community of Noatak by once again letting our hunters be successful by fixing the migration to its normal pattern.

Thank you very much for your time and consideration.

Regards,

  
Herbert Walton Sr.  
Tribe Administrator
