Unit 13

Resident and Non-resident moose harvest from 2012 to 2016

Total Resident moose harvest in unit 13 is 3979

Total Non-resident moose harvest in unit 13 is 90

The total percentage of harvest by non-residents for the last 5 years has only been about **2.3%**.

There are no conservation concerns with the moose population in unit 13 and I urge the board to fail proposal 29 that would eliminate non-resident moose hunting in this unit and to maintain the current non-resident draw allocation.
