

2013 Joint Board of Fisheries and Game Meeting Consensus Group

Supports proposal 29 with suggested language changes to be adopted:

29 5AAC96.XXX Incorporate Advisory participation in board deliberations as follows:

Advisory Committee Chairs or designee will advise and/or be requested to advise boards of fish and game in deliberations concerning regulation changes only to their Fish and Game Management Unit/s (GMU) or Regions.

We realize there is a need for some checks and balances in the process.

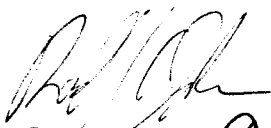

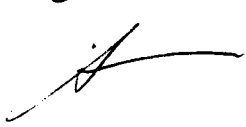

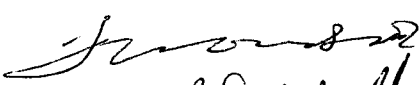

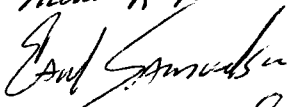

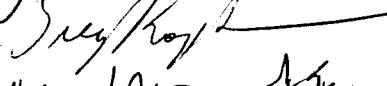

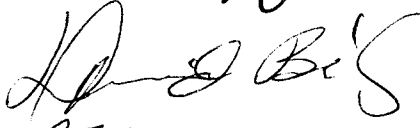

This may or may or may not add extra days the AC chairs will have to stay for deliberations to be more effective in this process. This regulatory fix will streamline information overload before the board's already tasking job. This will also insure information being to be fully vetted in the areas affected.
